Art Unit: 1723

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-19, drawn to an oil treatment apparatus, classified in class 210, subclass 167.
- II. Claim 20, drawn to a frying apparatus, classified in class 210, subclass 167.
- III. Claims 21-28, drawn to a method of treating oil, classified in class 210, subclass 739.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the centrifuge filter as required by the subcombination. The subcombination has separate utility such as in a system for treating lubricating oil.

Inventions III and I together with II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process could be carried out by other and materially different apparatuses, for example, an apparatus including a static filter as

opposed to a centrifuge as required by group I, or an apparatus including a reservoir not having a mechanism for conveying food products as required by groups I and II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Scott Oldham on 6-19-02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew O Savage whose telephone number is 703-308-3854. The examiner can normally be reached on Monday-Friday, 7:00am-3:30pm.
